# Bio-FCTS

---

<b><u>F</u></b> lavoniods	400 mg. Buckwheat 100 mg. Quercitin 25 mg. Green Tea
<b><u>C</u></b> -complex	75 mg. Vit. C 10 mg. Citrus Bioflavonoids
<b><u>T</u></b> hymus	10 mg. Neonatal Thymus
<b><u>S</u></b> pleen	10 mg Neonatal Spleen

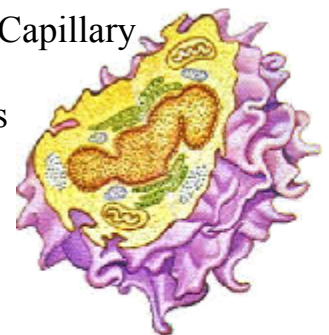

---

### Primary Indications

Chronic Virus  
Fragility Varicose Veins  
Bleeding Gums Cardio-Vascular  
Hot Disks  
Inflammatory Conditions

Strengthens Micro- Vasculature Capillary  
Easy Bruising Viral Support  
Support Arterio / Atherosclerosis  
Hemorrhoids

### Clinicians View

Bio-FCTS is a new fortified flavonoid product with each capsule containing 400 mg of Buckwheat culture, 100 mg of quercetin, 10 mg of citrus bioflavonoids, 25 mg of green tea extract (40 percent catechins), 75 mg of vitamin C, 10 mg of neonatal thymus and 10 mg of neonatal spleen, in a base of specially grown vegetable cultures supplying methyl donors and acceptors (OOrganik-15), SOD and catalase.

Bio-FCTS should be considered with immune dysfunction, viral infections, inflammation, hypertension and with some allergies (buckwheat content). Bio-FCTS is also very helpful in combination with Porphyra-Zyme for atherosclerosis, circulatory disorders and other conditions where poor circulation may be locus to the disorder such as tinnitus, vertigo, hemorrhoids, etc.

When Bio-FCTS was introduced its main objective was to provide a product that would help to prevent reverse transcription, the method by which a virus enters a healthy cell and replicates. Because the flavonoids in Bio-FCTS will help to prevent reverse transcription, it has been very successful with resolving chronic virus. Usually no more than 2 capsules, 3 times a day are needed.
